Development Experience

C, Flutter, IDL, Javascript, Python, R,
HTML, Shell,
Docker, Jupyter, Kubernetes,

Work History

Present – 24 Aug 2022

Graduate Teacher's Assistant — **Montana State University**

29 Jul 2022 – Present

Post-Bachelor's Researcher — **Institute of Complex Additive Systems Analysis**

22 May 2022 – 05 Sep 2017

Research Intern

During my time in this position, my contributions to projects I have worked on include:

- Data preprocessing for language detection models
- Developing analytical methods for RF and Bluetooth models
- Internet-Of-things research and metadata configuration
- Writing Helm Charts for several Kubernetes applications

The last project I worked on applied acoustic analysis as a method to detect aircraft.

16 Aug 2017 – 06 Sep 2016

High School Work Study — **National Security Agency**

As a requirement of this position, I had to pass a background check and a federal investigation to obtain a Top Secret security clearance. The tasks I was assigned involved clerical work relating to inventory, data transfer requests, and documentation management. In addition, I was a part of the effort to prepare for the Inspector General's inspection.

Education

Present – Aug 2022

Ph.D. Physics — **Montana State University**
Dissertation in TBA
GPA: TBA

May 2022 – Aug 2017

B.Sc. Physics — **New Mexico Institute of Mining and Technology**
Astrophysics and Atmospheric Physics Option
Minor in Mathematics
GPA: 3.28

Publications

18 Mar 2022

Atmospheric precipitable water vapor and its correlation with clear-sky infrared temperature observations

Physics Congress 2019

Research Projects

Present
Jan 2019

The Precipitable Water Project
The purpose of the research is to develop a method to estimate the amount of precipitable water from the effective temperature using low-cost instrumentation. As a part of the data collection process, we collected daily ground and sky temperatures to be analyzed by our preprocessing and analysis software suite.
Collaborators: *Vicki Kelsey, Dr. Kenneth Minschwaner*

Development Projects

Maintained
v2.0

Precipitable-Water Model Analysis Tool
An open source software suite for the analysis of precipitable water.
Documentation Page: `docs.pmat.app`

Not Maintained
v1.0.2

pacviz
A R package comprised of informal, radial data visualizations for regression and comparative analysis.
Documentation Page: `pacviz.sriley.dev`
