Development Experience

C, Flutter, HTML, IDL, JavaScript, Python, R, Shell,
Docker, Jupyter, Kubernetes,

Work History

<i>Present</i>	Graduate Teaching Assistant	[Montana State University]
24 Aug 2022	Within the Physics Department, my responsibilities while in this position involved: <ul style="list-style-type: none">• Supervising and assisting in undergraduate physics laboratory classes.• Assisting instructors with grading assignments.• Tutoring physics students	
29 Jul 2022	Post-Bachelor's Researcher	[Institute of Complex Additive Systems Analysis]
22 May 2022		
22 May 2022	Research Intern	
05 Sep 2017	During my time in these positions, my contributions to projects I have worked on include: <ul style="list-style-type: none">• Data preprocessing for language detection models• Developing analytical methods for RF and Bluetooth models• Internet-Of-things research and metadata configuration• Writing Helm Charts for several Kubernetes applications The last project I worked on applied acoustic analysis as a method to detect aircraft.	
16 Aug 2017	High School Work Study	[National Security Agency]
06 Sep 2016	As a requirement of this position, I had to pass a background check and a federal investigation to obtain a Top Secret security clearance. The tasks I was assigned involved clerical work relating to inventory, data transfer requests, and documentation management. In addition, I was a part of the effort to prepare for the Inspector General's inspection.	

Education

<i>Present</i>	Ph.D. Physics	[Montana State University]
Aug 2022		GPA: 2.85
May 2022	B.Sc. Physics	[New Mexico Institute of Mining and Technology]
Aug 2017	Astrophysics and Atmospheric Physics Option Minor in Mathematics	
		GPA: 3.28

Research Projects

- Present*
-
- Jan 2019 **The Precipitable Water Project**
The purpose of the research is to develop a method to estimate the amount of precipitable water from the effective temperature using low-cost instrumentation. As a part of the data collection process, we collected daily ground and sky temperatures to be analyzed by our preprocessing and analysis software suite.
Collaborators: Vicki Kelsey, Dr. Kenneth Minschwaner

Development Projects

- Maintained
v2.0 **Precipitable-Water Model Analysis Tool**
A computational utility to analyze the data to quantify the relationship between the zenith sky temperature and precipitable water.
Documentation Page: [docs.pmat.app](#)
-
- Not Maintained
v1.0.2 **pacviz**
A R package comprised of informal, radial data visualizations for regression and comparative analysis.
Documentation Page: [pacviz.sriley.dev](#)
