## **Development Experience**

### **Currently Learning**

## Work History

### Present

#### Research Intern

#### Institute of Complex Additive Systems Analysis

 $05~{\rm Sep}~2017$ 

The position involved tasks regarding a variety of different projects around the theme of complex systems analysis. As a part of a team, I have worked on projects regarding data preprocessing for language detection models, analysis of RF and Bluetooth models, and Internet-Of-Things research and development.

16 Aug 2017

#### High School Work Study

#### National Security Agency

06 Sep 2016

The position required a thorough background check, federal investigation including a polygraph, as part of the application in order to obtain Top Secret security clearance. Most of the tasks that were assigned revolved around clerical work, specifically inventory and data transfer requests added with Inspector General inspection preparations.

### Education

May 2022

## **B.Sc.** Physics

New Mexico Institute of Mining and Technology

Aug 2017

Astrophysics and Atmospheric Physics Option

Minor in Mathematics

**GPA:** 3.28

## **Publications**

Accepted

Atmospheric Precipitable Water and its Correlation with Clear Sky Infrared **Temperature Observations** 

Vicki Kelsey, Spencer Riley, Kenneth Minschwaner Atmospheric Measurement Techniques 10.5194/amt-2021-130

## Presentations

# Research Projects

#### Present

#### The Precipitable Water Project

Jan 2019

This research is based on developing a computational model of the relationship between daily precipitable water measurements and the atmospheric temperature. The goal of this research is to develop and utilize the relationship using low-cost instrumentation to deduce the amount of precipitable water from the effective temperature.

Collaborators: Vicki Kelsey, Dr. Kenneth Minschwaner

## Development Projects

Maintained

pacviz

v1.0.1

A R package comprised of informal, radial data visualizations for regression and comparative analysis.

Documentation Page: pacviz.sriley.dev

 $\begin{array}{c} {\rm Maintained} \\ {\bf v} 2.0 \end{array}$ 

Precipitable-Water Model Analysis Tool

An open source software suite for the analysis of precipitable water.
